# THE SCHOOL HISTORIC

The school building in the year 1906, when it was the Gendarmerie Inspectorate of Oltenita.

Our school was founded on September 1<sup>st</sup>, 1910, during Mayor Constantin Deculescu, in a building that belonged to the Gendarmerie Inspectorate of Oltenita, an **Elementary School** with three classes. In 1924, it is converted to **LOWER SCHOOL OF TRADES** with 5 classes. They then taught elementary school education and crafts: carpentry, wheelwrights, locksmiths and hardware.

In the school year 1931/1932 the school had 64 students and 7 teachers (4 supervisors and 3 teachers).

This educational unit operated continuously until World War II, when it disbanded.

Classes will resume after the war, but after the 1948 education law, the reorganisation of education, will go into liquidation. The last two series, a total of 48 students will graduate at the same time, in 1953, in carpentry and locksmith jobs.

Between 1970 and 1977, there will operate a **School of agricultural mechanics**.

After the earthquake of 1977, the school's main building was badly damaged and left derelict, will be demolished.

In 1990, after the fall of communism in Romania, the school was re-named the **School of Arts and Crafts** and currently the school group is called **"ION GHICA"**.

Scholar Group "Ion Ghica" Oltenita currently has over 1,100 students.

## Material base of school in images: WORKSHOP OF LOCKSMITH

Classes:  
the mechanic  
are formed,  
usually only  
of boys.  
The school  
teaches  
auto mechanics, but  
small classes  
(9<sup>th</sup> and 10<sup>th</sup>),  
training is  
locksmith  
practice.

Grades IX and X, the mechanic, took classes of locksmith practical skills training. This has provided a workshop at school, equipped with everything necessary for ownership job (bench, kits, devices and controllers, drawings, demonstration teaching materials, etc.), employed by foremen with a great professional experience and teaching.

## Material base of school in images: MECHANIC WORKSHOP

The school has  
a  
well-equipped workshop:  
qualifications  
transport  
technician  
and  
mechanical technician  
maintenance and  
repair.

Basic profiles in our school are those related to mechanics, especially qualified technician in mechanical maintenance and repair. Preparation for this profession is in the school workshop. It has all the necessary teaching material to learn how to remedy any defects occurring in vehicles.

## Material base of school in images : WORKSHOP OF TEXTILE

Qualification  
for the  
textile has  
flooded  
school  
our  
because  
that graduates  
from this  
their job  
easily find a  
job.

Textile classes are formed almost exclusively by girls, training practice, they are available in the school workshop well equipped with machines: electric sewing, embroidery etc., teachers with higher higher profile and experienced craftsmen.

# WORKSHOP OF BEAUTY AND HYGIENIC OF HUMAN BODY

School Group  
"Ion Ghica"  
Oltenita, a field  
of demand is  
the aesthetics and  
body hygiene  
the human  
represented by  
classes of  
hairdresser stylist.  
Because we  
have few  
teachers  
qualified in this  
area, the number  
of students  
is relatively  
low.

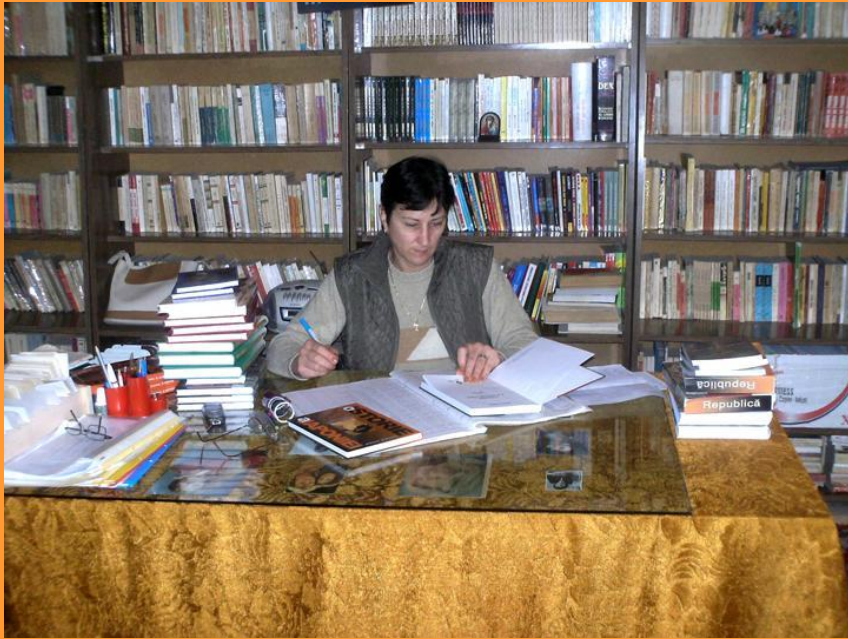

The material in this area is, however, excellent. We have a hairdresser-barber shop, equipped with specific equipment and furniture profession, including computers and digital camera software specialty. Diplomas obtained by schoolgirls in these classes at different contests are proof of training you acquire here

# THE INFORMATIC LABORATORY

Besides the subjects and practical training in our school, you can form a good general knowledge through other classes stipulated in the curricula, including the following of IT. Final year students have access to school computers to realize graduate work.

# OUR SCHOOL LIBRARY

Our school has a beautiful library, having about 10.500 volumes of books. You can find here works of literature, of history, science books, and other necessary books for the preparation of homework from the students and to create a solid general culture.

## **OTHER CABINETS AND LABORATORIES:** **pedagogical advice, history, geography,** **romanian language, chemistry-physics.**

**PROJECTS IN WHICH OUR SCHOOL WAS INVOLVED:**  
**European funded project, for textile classes in some schools in the country, called**  
**"Counseling programs and practical training**  
**for students in the Bucharest-Ilfov and South Muntenia "**

- **The project's objective:**
- **To develop work aptitudes for the last year students who are in transition from school to work life through the betterment of orientation and work counseling classes and by making school practice more efficient, thus creating the best premises to give them a job after graduation.**
